Project Checklist
SE 333
Spring 2020

Introduction

This is a list of requirements for your class project. Some of these things will become clearer once we have studied these. The items with '*' are items I would not expect you to understand yet.

☐ You have given me access to your code (GitHub, BitBucket, D2L)

☐ Project source code is in standard maven format

☐ Project has a pom.xml file

☐ Maven is able to build the project

☐ The project has sufficient unit tests (if you have a very large project, we can discuss

what "sufficient" means in your case.

☐ The project demonstrates 2 or more functional testing techniques *

☐ The project demonstrates an understanding of how mocks are used in testing *

☐ The maven configuration produces a coverage report *

☐ The maven configuration produces a static analysis report *
